Taxon.

INDEX.

VOL. CXXXIX.

Illustrations.

Names.

A

ADAMSON, Daniel, and Co., Ltd., Automatic Petrol Power Plant, 582
Ahrons, E. L., British Steam Railway Locomotive from 1825–1924, 2, 34, 66, 94, 124, 150, 178, 206, 232, 258, 288, 316, 344, 370, 398, 424, 452, 478, 506, 534, 562, 590, 616, 642, 670, 698; (Letters), 155, 240, 516
Albion Motor Workshop Wagon, 496
American Railways, 22,000-Volt Motor Generator Locomotives for, 334
Annaghkilly Viaduct, G.N. Railway, Ireland, 139
Aorangi, Union Steamship Company's Motor Liner, 16, 23, 42, 48, 71, 72, 106, 110, 111 (*Supplement, January 2nd*, 1925), (*Two-page Supplement, January 16th*, 1925)
Arapeti Dam and Storage Area, 266, 270
Arrol, Sir William, and Co., Ltd., Switchback Railway at the Paris Exhibition, 525
Arrol, Sir William, and Co., Ltd., Waterloo Temporary Bridge, 6·6, 701 (*Two-page Supplement, June 26th*, 1925)
Ashworth and Parker, 200 K.W. Steam-extraction Generator Set, 630
Aston Chain and Hook Company, Ltd., Jack Chain and Knotted Chain Making Machines, 292
Ateliers de Constructions Mécaniques de Vevey, Hydraulic Turbine, New Type of, 320
Atlantic Transport Company, Twin-screw Liner Minnetonka, 22 (*Supplement, January 2nd*, 1925)
Atmos High-pressure Boiler, J. V. Blomquist, 249
Austin Motor, Constant Current, 440
Australia, Irrigation Works in, 462, 465
Avery, W. and T., Ltd., Mechanism of Weighing Machine, 238

B

BAGNALL, W. G., Ltd., Fireless Engine Unique, 11
Barclay, Andrew, Sons and Co., Ltd., Narrow Gauge Engine for Assam, 168
Barking Power Station, County of London Electric Supply Company, 568
Beardmore Two-seater Wee Bee I. Monoplane, 19 (*Supplement, January 2nd*, 1925)
Beardmore, W., and Co., Ltd., Latvian Icebreaker Krisjanis Valdemars, 686
Beldis, Motor Ship, with a Cargo of Locomotives, 86
Belliss and Morcom, Air Compressor for Clyde Dock, 332, 333; (Letters), 434, 468
Beyer, Peacock and Co., Ltd., Locomotives, 11, 715, 716
Biles, Sir John, on Steam Engines *v.* Oil Engines, for Passenger Ships, 388
Birmingham Corporation, Nechells Power Station, 654, 660
Blackburn "Cubaroo" Torpedo-plane, 21 (*Supplement, January 2nd*, 1925)
Blackstone and Co., 55 B.H.P. Oil Engine and Fuel Injection Arrangement, 238
Blomquist, J. V., Atmos High-pressure Boiler, 249
Bow Power Station, Reconstruction and Equipment, 542, 546
Brackett, F. W., and Co., Ltd., Fixing Circulating Water Screening Plant, 224
Bradley and Turton, Ltd., Inclinable Presses with Double Roll Feed; also with Friction Feed and Friction-driven Screw Press, 239, 240
Bradley and Turton, Ltd., Rotary Shears, 239
Brigitta Bridge, Vienna, Shifting, 428
British Area Regulators, Ltd., Automatic Regulators, 351
British Aviator, Motor Tanker, Palmer's Shipbuilding Company, 5, 6 (*Supplement, January 2nd*, 1925)
British Industries Fair, 222, 238
British Insulated and Helsby Cables, Ltd., Collieries Electric Lighting System, 496
British Steam Railway Locomotive from 1825 to 1924, E. L. Ahrons, 2, 34, 66, 94, 124, 150, 178, 206, 232, 258, 288, 316, 344, 370, 398, 424, 452, 478, 506, 534, 562, 590, 616, 642, 670, 698; (Letters), 155, 240, 516—For Locomotives Illustrated, *see* Subjects Index, Locomotives
British Thomson-Houston Company's Works at Rugby, Part of, 679
Broadcasting Company's Equipment at New London Station, 306
Brooke, J. W. and Co., Ltd., Centrifugal Pump Driven by 4 B.H.P. Petrol Motor, 280
Brookhirst Switchgear Ltd., "Midget" Type Motor Starting Panels, 142
Brown, John, and Co., Ltd., Twin-screw geared-turbine Orient Liner Oronsay, 185, 190, 212, 213
Brunler Submerged Flame Boiler, 184
Bucyrus Company, Mechanical Shovel for Subway Work, 633
Burgerhout-Nobel Engine 900 B.H.P., 6
Burma Railways, Garratt Locomotive, Beyer, Peacock and Co., Ltd., 11
Burmeister and Wain, Four-cycle Marine Oil Engine, and 6750 S.H.P. Double-acting Engine and Crank Shaft, 246, 247
Burnt Oak Automatic Sub-station, 39 (*Supplement, January 2nd*, 1925)
Butler, Samuel, and Co., Ltd., Travelling Steam Crane, 443

C

CAMBRIDGE Instrument Company's Photo-electric Cell; Record Measuring Machine; Recording Accelerometer; Thread Recorder and Dodder Machine, 52
Chains (Jewellers), Ltd., Curb and Trace Chain-making Machines, 239, 276
Chancy–Pougny Hydro-electric Power Station, 321, 328
Chesapeake and Ohio Railway, Mallet Simple Locomotive, 14
Chorlton on Medlock Sub-station, 40
City of Venice, Single-screw Steamship, Workman, Clark and Co., Ltd., 22, 23,
Clayton Wagons, Ltd., Railway Steam Car for New Zealand, 570
Clothier, H. W., Design of Electrical Plant Control Gear, &c., 268
Clyde, New Dock Equipment on the, 233, 242, 274, 304, 332; (Letters), 434, 468
Cockerill Gas Engine, 7150 B.H.P., 166, 168
Coker, Professor E. G., Action of Cutting Tools, 318
Constructional Engineering Company, Ltd., A Handy Foundry Ladle, 469
Cox and Danks, Ltd., Salvage Gear at Scapa Flow, 23 (*Supplement, January 2nd*, 1925)
Crossley Brothers, Ltd., Gas and Oil Engines at the British Industries Fair, 222
Crossley Brothers, Ltd., Oil-driven Pumping Plant at Chipstead, 626, 632
Cunard Twin-screw Liner Aurania, 22 (*Supplement, January 2nd*, 1925)
Cunliffe and Croom, Ltd., Locomotive Wheel Quartering Machine, 250

D

DAHLERUS, J. B., Anti-friction Bearings for Heavy Duty, 181, 197; (Letters), 295, 434
Darnall Works New Iron Foundry, Davy Brothers, Ltd., 374, 382
Dawson, Sir Philip, and Professor S. Parker Smith, on Main Line Railway Electrification, Scandinavia, 98, 156; (Letters), 240, 295, 595; Germany, 620, 650—For details, *see* Subjects Index, Railway
Deschamps, J., Influence of Pulsations on Combustion, 152
Deutsches Museum, Munich, 644
Dolius, Motor Ship, Scott's Shipbuilding Co., Ltd., 5, 7 (*Supplement, January 2nd*, 1925)
Doxford, William, and Sons, Ltd., New Type Three-cylinder 1760 B.H.P. Engine, 6

E

EAST Ferry-road Engineering Works Company, Ltd., Grain Elevators for the Port of London, 296, 297, 300
East India Railway, Six-coupled Passenger Engine, Kitson and Co., Ltd., 12, 13
Electrical Apparatus Company, Machine Tool Switchgear, 362
Ellesmere Port, Water Softening Plant at, Wollaston Gas Producers, Ltd., 386
English Electric Company, Motor and Control Gear for Large Colliery Winder, 404, 408
Escher Wyss–Zoelly Steam Turbine Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)
Evershed and Vignoles, Ltd., Traction Recorder, 53
Exe Engineering Company, Ltd., Screw-cutting Lathe, 239

F

FAIRFIELD Shipbuilding and Engineering Company, Limited, Motor Liner Aorangi, 16, 23, 42, 48, 71, 72, 106, 110, 111 (*Supplement, January 2nd*, 1925), (*Two-page Supplement, January 16th*, 1925)
Ferranti, Ltd., Large Transformers, 680
Ferranti, Ltd., Million-volt Testing Equipments, 412
Flettner Rotor Ship Buckau, 23 (*Supplement, January 2nd*, 1925)
French Battleship Liberté, Salving the, 487

G

GARSTIN, Sir William Edmund (Portrait), 82
Gee, W. W. Haldane, Mechanical Equivalent of Heat, Joule's First Measurements, 426; (Letter), 516
General Electric Company, Single-phase Equipment for the Southern Railway, 486
General Electric Company's Works at Witton, Part of, 678
German Federal Railways—Electric Locomotives, 623, 650
Germany, Diesel Locomotive Design in, 578
Gloucestershire "Gannet" Biplane, 19 (*Supplement, January 2nd*, 1925)
Glover, M., and Co., Circular Saw Guard, 223
Gold Coast Railway, Eight-coupled Goods Engine, Vulcan Foundry Company, Ltd., 13
Great Western Railway Goods Tank Engine, 11
Great Western Railway 4–6–0 Passenger Engine Viscount Churchill, 11 (*Supplement, January 2nd*, 1925)
Grenoble Exhibition, 690
Grice, William, and Sons, Ltd., Chain Link Making Machine, 469
Guillemard Railway Bridge over the Kelantan River, 593
Gwynnes Engineering Company, Ltd., Light Motor Fire Engine, 554
Gwynnes "Invincible" Pumping Units, 76

H

HAMWORTHY Engineering Company's Automatic Air Compressor, 170
Hancock and Sons, Oxygas Metal-cutting Plant, 238
Handley Page Biplane "Hamilton," 21 (*Supplement, January 2nd*, 1925)
Harling, W. H., Adjustable Parabolic Curve, 580
Harrow and Rickmansworth Line, Automatic Signalling, 466
Harvey, William, Saint Paul's Cathedral, Its Structure, Defects and Repair, 129
Hawker Cygnet II. Biplane, 21 (*Supplement, January 2nd*, 1925)
Henley's Telegraph Works Company's Low-tension Laboratory and Cable-testing Department, 26
Herbert Chuck under Test, 662
Heywood, S. H., and Co., Ltd., 20-Ton Goliath Crane, 658
Hindmarsh, R. E., New Coal Staith at Whitehall Point, on the Tyne, 134, 141
Hulse and Co., Ltd., Machine for Re-truing Railway Tires, 414
Hunslet Engine Company, Locomotive for Chilian Mining Line, 13 (*Supplement, January 2nd*, 1925)
Hunt, L. J., Self-synchronising Alternator, 526
Hurst-Ball System of Casting Large Diameter Pipes, 416

I

IGRANIC Rotor Control Gear and Low-tension Switchboard, 275
Igranic Electric Company, Ltd., Variable Grid Leak, Variometers, High-resistance Potentiometer, "Unitune" Fixed Coupler, 53
Industrial Waste Eliminators, Ltd., Oil Separator, 239, 240
International Combustion, Ltd., and Vickers-Spearing Boiler Company, Ltd., Coal-pulverising Plant and Boilers, 660
Italian Double-ended Diesel-electric Locomotive, 358
Italian Locomotives at Grenoble Exhibition, 690
Italian Scouts, The Leone, Tigre, Pantera, 456, 600, 604

K

KANGO Company, Ltd., Electric Hammer, 718
Karrier Motors, Ltd., Combined Road Sweeper, Sprinkler and Dust Collector, 441; (Correction), 504
Kent-Hodgson Turbine Steam Meter, 684
Krupp-Zoelly Steam Turbine Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)

L

LATVIAN Icebreaker Krisjanis Valdemars, W. Beardmore and Co., Ltd., 686
Leafield Coupled Arc, 634
Leafield Wireless Station, Primary Inductance and Variable Coupler, 27 (*Supplement, January 2nd*, 1925)
Ling Pneumatic Motor and Drilling Head, 442
Liptack Furnace Arches, Ltd., Suspended Furnace Arch, 361
Littleton (Queen Mary) Reservoir and Works, 672, 682, 705, 710 (*Two-page Supplement, June 19th*, 1925)
Lloyd Sabando Liner Conte Biancamano, Wm. Beardmore and Co., Ltd., 497
Lomonosoff Diesel-electric Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)
London Broadcasting Station, New, 306
London, Midland and Scottish Railway, Baltic Tank Engine, 10 (*Supplement, January 2nd*, 1925)
London, Midland and Scottish Railway 0–6–0 Goods Engine, 10
London and North-Eastern Railway Garratt Locomotive, Beyer, Peacock and Co., Ltd., 715, 716
London and North-Eastern Railway Mikado Locomotive, Mr. H. N. Gresley's Design, 715, 717
Longbridge Mercury Arc Rectifier Sub-station, Birmingham, 678

M

MANGAHAO Hydro-electric Scheme, River, Reservoir, Power Station, Dams and Electrical Equipment, &c., 266, 270
Marconi's Wireless Telegraph Company, 50-Watt Wireless Transmitter, Power Amplifier, 54
Massip Steam Trap, E. Lassen and Co., 608
Mather and Platt, Ltd., Rotary Converters in Liverpool Sub-stations, 391
Metropolitan Asylums Board Motor Ambulance and Ambulance Reconditioning Works, 209, 216
Metropolitan-Vickers Electrical Company, 481
Molesworth, Sir Guilford Lindsey (Portrait), 137
Moore, G. E., Stroboscopic Determination of Speeds and Frequencies, Apparatus and Methods Used, 209
Morison, Donald Barns (Portrait), 521
Morris Engines (Coventry), Ltd., Works, Hardening and Carburising Plant, 387
Morris, J., on Vibration in Engine Test Gear, 494
Muir, Wm., and Co., Ltd., Plano-milling Machine for Profile Work, 308
Mullard Radio Valve Company, Transmitting Valve, 53, 54

N

NATIONAL Gas Engine Company, 3½-Kilowatt Lighting Set and 66 B.H.P. Heavy Oil Engine, 223, 224
New Conveyor Company, Foundry Sand Recovery Plant, 572
New Zealand, Manawatu Road Reconstruction, 552, 553
Niagara, Bridges Over, 490, 492
Norte Railway 3000-Volt D.C. Electric Locomotive, 78, 84
North British Locomotive for Western Australian Railways, 13; and Geared Steam Turbine Condensing Locomotive, 9 (*Supplement, January 2nd*, 1925)
North-Eastern Marine Engineering Company, Ltd., Engines of the Raby Castle, 458, 459

O

ONGAR and Brentwood Wireless Stations, 596, 597

Orient Liner Oronsay, John Brown and Co., Ltd., 185, 190, 212, 213
Orient Twin-screw Liner Orama, 22 (*Supplement, January 2nd*, 1925)

P

PARIS Exhibition, Switchback Railway at, Sir William Arrol and Co., 525
Parnall Pixie III. Monoplane, 21 (*Supplement, January 2nd*, 1925)
Parsons Three-cylinder Marine Motor for Lifeboat, 160; (Letter), 188
Patchell, W. H., Super-power Stations in America, 264
Physical and Optical Societies' Exhibition, 52
Pickles and Hall Pitting Gauge, 554
Pickles, John, and Son, Ltd., Mortising, Boring and Gaining Machine, 359
Poldhu Experimental Short Wave Wireless Station (*Supplement, January 2nd*, 1925)
Pollock, Walter, Increasing the Efficiency of the Screw Propeller, 402, 444
Poultney, E. C., Fifty Per Cent. Cut-off Locomotives, 510, 550
Precision Photo Printing Plant, Ltd., Blue Print Washing and Drying Machine, 523

R

RABY Castle, Single-screw Motor Ship, Caledon Shipbuilding and Engineering Company, Ltd., 458
Rainham Sewage Works, Tanks, 25 (*Supplement, January 2nd*, 1925)
Record Electrical Company, Improved Instruments, 279
Rees Propeller Jet Propulsion Device, 494
Reyrolle Contactor Panels and High-tension Switchgear, 275
Rhodes, Brydon and Youatt, Ltd., Combined Electric Motor and Pump, 662
Roberts, Charles, and Co., Ltd., 15-Ton Side-tipping Wagons, 85
Robertson, W. H. A., and Co., Ltd., Wire Flattening Rolling Mills, Roller Bearings, Edging Rolls, Coiling Stands, &c., 193
Robey and Co., Ltd., Large Geared Colliery Winder, 404, 408
Robinson, Thomas, and Sons, Ltd., New Woodworking Machines, 522
Rohrbach Metal Aeroplane Company, Flying Boat, 350, 354
Rosenhain, Dr. W., and Mr. A. C. Sturney, Report to Cutting Tools Research Committee, 126, 127
Rugby Station Aerial, 26, 27
Ruston and Hornsby, Ltd., 110 B.H.P. Oil Engine, 222, 223

S

SAINT Paul's Cathedral, Its Structure, Defects, and Repair, William Harvey, 129
Sennar Dam, 101 (*Supplement, January 2nd*, 1925)
Sentinel Wagon Works, Ltd., Geared Shunting Locomotive, 432, 433, 436
Siemens Wireless Equipment for Motor Lifeboat, 160; (Letter), 178
Simla Water Supply, High-head Pumping Plant for, 162, 167 (*Two-page Supplement, February 6th*, 1925)
Smith, Dempster, and Arthur Leigh on Lathe Tools and Fine Cuts, 319
Soldo Company's New Tinning Compound, 413
South Wales, Steep Ropeways in, R. White and Sons, 514, 518
Southampton Floating Dock, 37 (*Supplement, January 2nd*, 1925)
Southern Railway, Single-phase Equipment for, General Electric Company, 486
Stanton, Dr. T. E., Friction of Pistons and Piston Rings, 70
Stanton, Dr. T. E., and Mr. J. H. Hyde, Report to Cutting Tools Research Committee, 126, 127; (Letter), 155
Stockton and Darlington Railway Locomotive The Magnet, as Reconstructed, Timothy Hackworth, 440
Stone, J., and Co., Ltd., Nipple Expander, 362; (Letter), 406
Swanley Motor Ship, Barclay, Curle and Co., Ltd., 5, 7 (*Supplement, January 2nd*, 1925)
Swansea Dry Dock, 37 (*Supplement, January 2nd*, 1925)
Swedish Destroyers Nils Ehrenskold and O. H. Nordenskjöld, 685
Swiss Federal Railway's Motor Coach with Oil Transmission Gear, 308

T

TAYLOR, H. W., Three-wire Direct-current Distribution Networks, 75
Taylor, Major A. M., on High-pressure Cables, 115
Thom, A., and J. Small, Velocity of Wind in Conical Ducts, 262
Thomas, H. A., on Measurement of Mechanical Vibrations, 102
Thornycroft, John I., and Co., Ltd., Twin-screw Ferry Boat Kathleen, 662
Tilling-Stevens and Foamite Fire-foam, Ltd., Motor Foam Fire-fighting Engine, 467
Towler, C. O., Steam Regeneration: Its Possibilities, 592
Tracey, A. I., on Super-tension Cable Dielectrics, 580
Trent Navigation Improvement, Holme Lock, 37 (*Supplement, January 2nd*, 1925)
Triumph, H.M.S., and Her Cylinder Liner, Engineer-Captain Edgar C. Smith, 498

U

UNION Steamship Company's Motor Liner Aorangi, 16, 23, 42, 48, 71, 72, 106, 110, 111 (*Supplement, January 2nd*, 1925) (*Two-page Supplement, January 16th*, 1925)
United States Cruiser Marblehead, 358
Upper Reno Power Project, 608

V

VEYRIER, Commandant J., Proposed Submarine Tubular Railway, 245
Vickers Ltd., Eight-cylinder 2700 B.H.P. Solid Injection Engine, 6
Vickers-Petters Four-cylinder Hot-bulb Engines, 76
Vickers "Vulture" Amphibian Biplane, 21
Virginian Railway, Electrification of, and Triple Electric Locomotive for, 606
Vulcan Motor and Engineering Company (1906), Ltd., War Office Subsidy 2-Ton Chassis, 378, 379
Vulcan Roadless Half-track Vehicle, 572, 574

W

WATERLOO Temporary Bridge, Sir W. Arrol and Co., Ltd., 686, 701 (*Two-page Supplement, June 26th*, 1925)
Wells, A. C., and Co., Spraying Plant for Laminated Core Stampings, 58
Western Electric Company, Seven-valve Supersonic Wireless Receiver, 470
Westland Widgeon Monoplane and Westland Wood Pigeon Biplane, 21 (*Supplement, January 2nd*, 1925)
White, R., and Sons, Steep Colliery Ropeways in South Wales, 514, 518 (*Two-page Supplement, May 8th*, 1925)
Wightman, J., Miniature Radial Drilling Machine, 497
Wordingham, Charles Henry (Portrait), 164
Worthington-Simpson Pumping Machinery, Boilers, &c., for the Littleton—Queen Mary Reservoir and Works, 672, 682, 705, 710 (*Two-page Supplement, June 19th*, 1925)

Y

YORKSHIRE Engine Company, Ltd., Eight-coupled Engine for Bengal-Nagpur Railway and Tank Locomotive for Nitrate Railways, 13, 14

Subjects.

A

ADJUSTABLE Parabolic Curve, W. H. Harling, 580

AERONAUTICS:

Aeroplanes of 1924, 18 (*Supplement, January 2nd*, 1925)—For Names of Machines *see* Names Index; *see also* Aeronautics, Miscellaneous Index
Flying Boat, All-metal, Rohrbach Metal Aeroplan Company, 350, 354
AIR Compressor, Automatic, Hamworthy Engineering Company, Ltd., 170
Air Compressor for Clyde Dock, Belliss and Morcom, Ltd., 332, 333; (Letters), 434, 468
Alchemist's Laboratory of the Middle Ages, 646
Anti-friction Bearings for Heavy Duty, J. B. Dahlerus, 181, 197; (Letters), 295, 434
Arch, Suspended Furnace, Liptak Furnace Arches, Ltd., 361

B

BLUE Print Washing and Drying Machine, Precision Photo Printing Plant, Ltd., 523
Boiler, Atmos High-pressure, J. V. Blomquist, 249
Boiler, Internal Combustion, Oscar Brunler, 184
Boiler-house and Equipment for Bow Power Station, 542, 546
Boiler-house (Trenton Channel), 264
Drum, Partly Forged, for 1200 lb. Boiler (Weymouth), 265
Drum, Completed Steam, for 1200 lb. Boiler, (Weymouth), 265
Boilers, Yarrow High-pressure, Howden Combined Cylindrical and Water-tube High-pressure, Sir John Biles, 388
Bridge, Brigitta, Vienna, Shifting, 428
Bridge, Guillemard Railway, Over the Kelantan River, 593
Bridge, Waterloo Temporary, Sir W. Arrol and Co., Ltd., 686, 701 (*Two-page Supplement, June 26th*, 1925)
Bridges Over the River Niagara, 490, 492

C

CABLES—*see* Electrical Matters
Calorimeter for Testing Fuel Oil, 593
Cathedral, Saint Paul's, Its Structure, Defects and Repair, William Harvey, 129
Centrifugal Casting of Large Diameter Pipes, Hurst-Ball System, 416
Chain Link Making Machine, William Grice and Sons, Ltd., 469
Chain Making—*see also* Wire Chain
Chassis, War-office Subsidy 2-Ton, Vulcan Motor and Engineering Company, Ltd., 378, 379
Chuck under Test, Alfred Herbert, Ltd., 662
Circular Saw Guard, M. Glover and Co., 223
Circulating Water Screening Plant, Fixing, F. W. Brackett and Co., Ltd., 224
Coal-pulverising Plant and Boilers, International Combustion, Ltd., and Vickers-Spearing Boiler Company, Ltd., 660
Coal Staith, New, at Whitehall Point, on the Tyne, R. E. Hindmarsh, 134, 141
Crane, 20-Ton Goliath, S. H. Heywood and Co., Ltd., 658
Crane, Travelling Steam, Samuel Butler and Co., Ltd., 443
Cutting Tools—*see* Machine Tools

D

DAM, Sennar, 101 (*Supplement, January 2nd*, 1925)
Dielectrics, Super-tension Cable, A. I. Tracey, 580
Dock Equipment on the Clyde, New, 233, 242, 274, 304, 332; (Letter), 434
De-watering Plants for Graving Docks 1 and 3, 233, 242
No. 3 Graving Dock Pumps, 274
Hydraulic Power Services for Prince's Dock and the Graving Docks, 304; (Letters), 434, 468
Pneumatic and Electric Services, Prince's and Graving Docks, Nos. 1, 2 and 3, 332
Docks, Southampton and Swansea, 37 (*Supplement, January 2nd*, 1925)
Drills—*see* Machine Tools

E

ELECTRICAL MATTERS:

Aorangi, Electrical Equipment for—*see* Ships
Barking Power Station, 40,000 K.W. Parsons Turbo-generator set, Yarrow Boiler, 568
Bow Power Station Reconstruction, 1000-K.W. Turbo-generator, &c., 542, 546
Chancy-Pougny Hydro-electric Power Station, 321, 328
Change Coil Multi-range Test Set, "Circscale" Alternating-current Ammeter, Record Electrical Company, 279
Chorlton on Medlock Sub-station, 40
Clyde New Dock Equipment, Electrical, 233, 242, 274, 304, 332
Collieries' Electric Lighting System, British Insulated and Helsby Cables, Ltd., 496
Constant Current Motors, Gilbert Austin, 440
Design of Electrical Plant Control Gear, &c., H. W. Clothier, 268
High-pressure Cables, Major A. M. Taylor, 115
Institution of Electrical Engineers, Various Works Visited, 654, 660, 679
Laboratory, High-voltage Testing, Metropolitan-Vickers Electrical Company, 481
Laboratory, Low-tension and Cable-testing Department, Henley's Telegraph Works Company, 26
Leafield Arc Room, 634
Leafield Wireless Station, Primary Inductance and Variable Coupler, 27 (*Supplement, January 2nd*, 1925)
Lighting and Power-generating Set, 60 B.H.P. Auxiliary for Grain Elevators, 298
Locomotives, Electric—*see* Locomotives
Machine Tool Switchgear, Electrical Apparatus Company, 362
Mangahao Hydro-electric Scheme, Power Station and Equipment, 266, 270
"Midget" Type Motor Starting Panels, Brookhirst Switchgear, Ltd., 142
Million-Volt Testing Equipment, Ferranti, Ltd., 412
Nechells Electric Power Station, Birmingham, 654, 660
Raby Castle, Allen Direct-current Generators for, 459
Relay, A New, 498
Rotary Converters, 1500-K.W. Self-synchronising, Mather and Platt, Ltd., 391
Rugby Station Aerial, 26, 27
Self-synchronising Alternator, L. J. Hunt, 526
Single-phase Equipment for the Southern Railway, 486
Super-power stations in America, W. H. Patchell, 264
Switches, Electro-pneumatic High-voltage Unit and Electro-pneumatic Cam-operated, for Norte Railway Locomotive, 84
Synchronous Motors for Mining Work, Major E. I. David, 248
Three-wire Direct-current Distribution Networks, H. W. Taylor, 75
Transformer, 500,000-Volt and Variable-speed Motor Generator Sets, 481
Transformers, Large, Ferranti, Ltd., 680
Transverter, 2000-K.W., 26 (*Supplement, January 2nd*, 1925)
Winder, Colliery, Motor and Control Gear for, English Electric Company, 404, 408

ENGINES AND MOTORS:

Aorangi, Quadruple-screw Motor Liner, Engines and Auxiliaries, 16, 23, 42, 48, 71, 72 (*Supplement, January 2nd*, 1925) (*Two-page Supplement, January 16th*, 1925)
Blast-furnace Gas Engine, 7150 B.H.P., Soc. Anon. John Cockerill, 166, 168
Burgerhout-Nobel Engine, 900 B.H.P., 6
Crossley Gas Engine, 12½ B.H.P., 222
Crossley Oil Engine, 14 B.H.P., 222
Double-acting, 6750 S.H.P. Engine and Crank Shaft for Motor Liner Gripsholm, Burmeister and Wain, 247
Eagle IX. Engines for All-metal Flying Boat, 350, 354
Four-cylinder Hot-bulb Engines for Driving Centrifugal Pumps, Vickers-Petters, Ltd., 76
Gas Engine for Small Lighting Set, and 66 B.H.P. Heavy Oil Engine, National Gas Engine Company, 223, 224
Lifeboat, Three-cylinder Marine Motor for, Parsons Motor Company, Ltd., 160; (Letter), 188
Marine Oil Engine Trials, Indicator Drive, Thermal Circuits, 346
New Type Three-cylinder 1760 B.H.P. Engine, William Doxford and Sons, Ltd., 6
Oil Engine, 55 B.H.P. and Fuel Injection Arrangement, Blackstone and Co., 238
Oil Engines, Four-cycle Marine, Burmeister and Wain, 246, 247
Oronsay, Engine-room—*see* Ships
Solid Injection Engine, Eight-cylinder 2700 B.H.P., Vickers Ltd., 6
Steam Engines *v.* Oil Engines for Passenger Ships, Sir John Biles, 388

ENGINES AND MOTORS (*continued*):

200-K.W. Steam-extraction Generator Set, Ashworth and Parker, 630
Two-cylinder Oil Engine, 110 B.H.P., Ruston and Hornsby, Ltd., 222, 223
Uniflow Engines, 770 B.H.P., for Pumping Station at Littleton, Worthington-Simpson, Ltd., 672, 682, 705, 710 (*Two-page Supplement, June 19th*, 1925)
EXHAUSTERS for Grain Elevators, 297

EXHIBITIONS:

British Industries Fair, 222, 238
Paris Exhibition, Switchback Railway at, 525
Physical and Optical Societies' Exhibition, 52
EXTENSOMETERS and Recording Mechanism, 102

F

FAIRS—*see* Exhibitions
Fire-engine, Light Motor, Gwynnes Engineering Company, Ltd., 554
Fire-fighting Engine, Motor Foam, 467
Floating Winch Gear for Raising German Destroyers at Scapa Flow, 23 (*Supplement, January 2nd*, 1925)
Flying Boat—*see* Aeronautics
Foundry Ladle, Constructional Engineering Company, Ltd., 469
Foundry Sand Recovery Plant, New Conveyor Company, 572

G

GAS Engines—*see* Engines
Grain Elevators for the Port of London, East Ferry Road Engineering Works Company, Ltd., 296, 297, 300

Lock Gates, New, on the River Lea, 542

LOCOMOTIVES:

Bengal-Nagpur Railway, Eight-coupled Engine, 13, 14

British Steam Railway Locomotive from 1825–1924, E. L. Ahrons, 2, 34, 66, 94, 124, 150, 178, 206, 232, 258, 288, 316, 344, 370, 398, 424, 452, 478, 506, 534, 562, 590, 616, 642, 670, 698; (Letters), 155, 240, 516
Period 1825–1827, 2
Period 1828–1831, 34
Period 1830–1837, 66, 94
Period 1837–1841, 124, 150
Period 1841–1848, 178, 206
Locomotive Performance to 1845, 232
Period 1846–1849, 258, 288
Period 1849–1855, 316, 344, 370, 398
Period 1855–1859, 424, 452
Period 1860–1865, 534, 562, 590
Period 1866–1869, 616, 642
Period 1870–1875, 670, 698

Locomotives Illustrated:

Adams', W., Tank Engine, 1865, 563
Allan's "Crewe" Type Engine, 1845, 179
Armstrong's Express Locomotive, 1866–1869, 616
Banking Engine, Edinburgh and Glasgow Railway, 1844, 206
Beattie's Tank Engine, 1863, 562
Beyer, Peacock and Co.'s Goods Engine, 1857, 454
Beyer-Peacock Locomotive, 1862, 535
Beyer, Peacock and Co.'s Tank Engine, 1858, 453
Beyer-Peacock's Tank Engine, 1861, 562
Bodmer's Balanced Engine, 206
Bolton and Leigh "Lancashire Witch," 1828, 34
Bristol and Birmingham Engine, Vulcan Foundry, 180
Bristol and Exeter Railway, 399
Bury's 0–4–0 Engine "Liverpool," 1830, 66
Bury's 2–2–0 Passenger Engine, Sections of, 1837, 124
Caledonian Engine, 1868, 617
Caledonian Locomotive, 1858–1864, 423
Caledonian Tank Engine, 1873–4, 700

LOCOMOTIVES (*continued*):

British Steam Railway Locomotive (*cont.*):

Locomotives Illustrated (*continued*):

Chester and Birkenhead Railway, R. Stephenson, 1853, 346
Connor's Locomotive, 1859, Rebuilt, 534
"Cornwall," The, London and North-Western Railway, Rebuilt, 1858, 259
Crampton Engine, 1848, 259
"Crampton" Engine, Inside Cylinder, 1849, 316
Crampton Engine, London and North-Western Railway, 1847, 259
Crampton Engine, London and North-Western Railway, 1848, 259
Crampton Engine for Midland Railway, 1848, 259
Cylinders of Compound Locomotive, 1852, 317
Cylinders and Valves, 67
Dewrance's Liverpool and Manchester Engine, 1841, 179
Dublin and Kingstown Railway Engine "Vauxhall," 1834, 94
Dundee and Newtyle Railway Engine "Earl of Airlie," 1833, 94
Edinburgh and Glasgow Engine, 1856, 424
2–2–0 Engine Exhaust Pipe, 68
Engine for the London, Chatham and Dover Railway, 1861–2, 536
2–2–0 Engine "Pioneer," 1832, 67
Fire-box, Manchester, Sheffield and Lincolnshire Railway, 370
Fossick and Hackworth's Goods Engine, 1864, 564
Foster and Rastrick's "Stourbridge Lion," 1829, 34
Gooch's Bogie, 1849, 258
Gooch's, D., Tank Engine, 1862, 562
Gooch's "Great Western," 1846, 258
0–4–0 Goods Engine, 1831, 67
Goods Engine, Glasgow and South-Western Railway, 1864, 564
Glasgow and South-Western Engine, 1857, 425
Glasgow and South-Western Locomotive, 1873–7, 698
Goods Engine by Sharp, Stewart and Co., 1861–1862, 564
Gray's Hull and Selby Engine, 1842–44, 178
Great Eastern Express Engine, 1862, 534
Great Northern Engine, 1861, 535
Great Northern Engine, 1867, 617
Great Western Engine "Iron Duke," 1847, 258
Great Western Locomotive, 1855, 424
Great Western Locomotive "Centaur," Elevations and Section, 151
Great Western Locomotive "Leo," 1841, 152
Great Western Locomotive "Tityos," 1842, 152
Great Western Railway "North Star," Broad Gauge, 150
Great Western Tank Engine, 1874–1878, 699
Hackworth's 0–6–0 Engine, 1838, 124
Hackworth's, T., "Sanspareil," 1849, 288
Hawthorn Engine, Great Northern Railway, 1852, 344
Hawthorn's Spring Gear, 344
Hawthorn's 0–4–2 Steam Dryer Locomotive, 150
Hawthorn's "Swift," 1836, 94
Hawthorn Type 2–2–2 Engine, 125
Highland Locomotive, 1874, 699
"Jenny Lind," E. B. Wilson, 1847, 288
Kirtley's Express Locomotive, Midland Railway, 800 Class Re-built, 670
Kirtley's Express Locomotive, Midland Railway, 890 Class, 1871, 671
Kitching's Stockton and Darlington Engine, 1848, 206
Kitson and Co.'s Engine, 1848, 289
Kitson's Leeds and Thirsk Engine, 1849, 289
Lancashire and Yorkshire Tank Engine, 1860, 453
"Locomotion No. 1," Stockton and Darlington Railway, 2
London, Brighton and South Coast Tank Engine, 1859, 452
London, Brighton and South Coast Tank Engine, 1873–1887, 699
London, Chatham and Dover Railway, Locomotive for, 1862, 316
London, Chatham and Dover Railway Tank Engine, 1866, 563
London and North-Western Engine, R. Stephenson and Co., 1847, 180
London and North-Western Goods Engine, 1859–1872, 453
London and North-Western Railway Engine, 1859, 534
London and North-Western Railway Engine, 1861, 534
London and North-Western Railway, McConnell, 1852–4, 345
London and North-Western Railway, McConnell "Bloomer," 1853, 345
London and North-Western Railway, McConnell's Goods Engine, 1854–1863, 371
London and North-Western Railway, Rebuilt "Bloomer," 344
London and North-Western Side-tank Engine, 1856, 452
London and South-Western Locomotive, 1855, 424
London and South-Western Locomotive, 1859, 425
London and South-Western Railway, Joseph Beattie, 1851–55, 346
London and South-Western Railway, Joseph Beattie, 1855, 346
McConnell's London and North-Western Engine, 1849, 288
McConnell's Tank Engine, 1862, 562
Manchester, Sheffield and Lincolnshire Railway, Goods Engine, 1852–4, 370
Mather, Dixon Type 2–2–2 Engine, 125
Metropolitan Tank Engine, 1864, 563
Metropolitan Tank Engine, 1868, 618
Midland Engine, 1865, 535
Midland Engine, 1866–68, 616
Midland Engine, 1867, Beyer, Peacock, 616
Midland Goods Engine, 1858, 454

LOCOMOTIVES (*continued*):

British Steam Railway Locomotive (*cont.*):

Locomotives Illustrated (*continued*):

Midland Locomotive, No. 1, 1859, 424
Midland Tank Engine, 1875–6, 700
Monmouthshire Railway, Sharp Brothers' Tank Engine, 1849, 371
Monmouthshire Railway, Stothert and Slaughter's Engine, 1854, 372
Neilson and Co.'s Tank Engine, 1862, 318
Neilson's Single-cylinder Engine, 1857, 454
North-Eastern Back Tank Engine, 1874, 700
North-Eastern (Stockton and Darlington) Locomotive, 1872–4, 699
North-Eastern (Stockton and Darlington) Locomotive, 1875–6, 698
North-Eastern Locomotive, 1864–5, 536
North London Tank Engine, 1868, 617
Northumbrian, Liverpool and Manchester Railway, 1830, 36
"Novelty," The, 1829, 36
Pearson's Engine for the Bristol and Exeter Railway, 1853, 398
Pearson's Engine for the Bristol and Exeter Railway, 1868, 398
Ramsbottom's Engine, 1866–1873, 616
Rennie's 0–4–2 Outside Cylinder Engine, 150
Rocket, The, Liverpool and Manchester Railway, 1829, 35
Rothwell Type 2–2–2 Engine, 125
"Royal George," Stockton and Darlington Railway, 2
Saddle Tank Engine, 1849, 258
Saddle Tank Engine, London and North-Western Railway, 1854–1857, 318
"Sanspareil," The, 1829, 35
Sharp Brothers' Engine, 1848–1854, 370
Sharp Brothers' Manchester, Sheffield and Lincolnshire Railway Engine, 1849, 289
Sharp Roberts Type 2–2–2 Engine, 125
Sharp, Stewart and Co.'s Side Tank Engine, 1851–2, 371
Sharp, Stewart and Co.'s Tank Engine, 1866–8, 618
Shrewsbury and Chester Railway, Vulcan Engine, 1853, 370
Sinclair's Tank Engine, 1864, 563
South-Eastern Locomotive, 1859–1875, 425
South-Eastern Railway, Cudworth, 356
South-Eastern Tank Engine, 1866, 617
Spring Gear, Bristol and Exeter Railway, 398
Stephenson's 0–4–2 Engine, 1833, 94
Stephenson's 2–2–2 Engine of 1837, 67
Stephenson's 2–4–0 Engine, 1837, 150
Stephenson Engine, Midland Railway, 1852, 344
Stephenson's Engine for the Stockton and Darlington Railway, 1860, 535
Stephenson's Engine for the Stockton and Darlington Railway, 1862, 535
Stephenson's Goods Engine, 1843, 206
Stephenson's "Long Boiler" Passenger Engine, 1841, 179
Stephenson's Outside Cylinder Long Boiler Engine, 180
Stephenson's "Planet," Liverpool and Manchester Railway, 1830, 66
Stephenson, R., and Co.'s Tank Engine, 1855, 452
Stephenson Type 2–2–2 Engine, 124
Stirling's Engine for the Glasgow and South-Western Railway, 1855, 316
Stirling's 2–2–2 Outside Cylinder Engine, 150
P. Stirling's Express Locomotive, Great Northern Railway, 1870, 670
Stockton and Darlington Engine, 1866, 618
Stockton and Darlington Engine "Commerce," 1847, 206
Stockton and Darlington Engine "Meteor," 1850, 178
Stockton and Darlington Locomotive, 1845–6, 178
Stockton and Darlington Railway Engine "Sunbeam," 1837, 94
Stockton and Darlington Railway—"Wilberforce," 1831, 94
Stroudley's Express Locomotive, London, Brighton and South Coast Railway, 1874, 670
Stroudley's Express Locomotive, London, Brighton and South Coast Railway, 1872–5, 671
Sturrock's Engine Rebuilt, 616
S. W. Johnson's Engine, 1867, 616
Tank Engine by the Avonside Company, 1864–6, 564
Tank Engine, Eastern Counties Railway, 1851, 317
Tank Engine, Edinburgh and Glasgow Railway, 1850, 317
Tank Engine by W. Fairbairn and Sons, 1850, 317
Tayleur's Bogie Locomotive, 1833, 94
Tayleur Type 2–2–2 Engine, 125
Valve Gear, 1846–1852, 399
Vulcan Engine for Waterford and Kilkenny Railway, 1846, 290
Vulcan Locomotive, 1848, 316
Vulcan Locomotive, Shrewsbury and Hereford Railway, 1853, 345
Webb's Charles Dickens, 1882, 698
Webb's Precursor," 1874, 698
White Raven, 1863, 562
William the Fourth, 1830, 36
York, Newcastle and Berwick Engine, R. Stephenson and Co., 1848, 180

Locomotives Built for Abroad:

East India Railway, Locomotive for, 1856, 507
Ghat Engine, G.I.P. Railway, 1862, 644
Giovi Incline, Engine for, 506
Hawthorn's Engine for South America, 506
Kitson's Engine for Chile, 1858, 506
Oudh and Rohilkhand Railway Engine, 1865, 644
Stephenson's Engine for Belgium, 506
Stephenson's Engine for Egypt, 1859, 506
Stephenson's Engine for New South Wales, 1854, 507
Tudela and Bilbao Railway Engine, 1862, 644
Vulcan Engine for India, 1852, 507

LOCOMOTIVES (*continued*):

Locomotives for Ireland:

Beyer, Peacock Engine for the Ulster Railway, 1866, 643
Dublin and Belfast Junction Railway Engine, 1866, 643
G.S. and W. Railway Express Engine, 1858–1863, 642, 643
McDonnell's Back Tank Engine, G.S. and W. Railway, 1869, 643
Addendum, Dewrance's Liverpool and Manchester Railway, 1841–5, 507
Addenda, 372

Locomotive Performances, 1845–1849, 478

Details:

Axle-boxes, Wheels, Tires, &c., 454
Beattie's Feed-water Heating Apparatus, 453
Bouch's Blast Pipe, 642
Caillet's Movable Axle, 590
Cast Iron Fire-bars, 454
Coke-burning Fire-boxes, 479
Coupling-rods, J. Beattie, 454; W. Fairbairn and Sons, 454
Dewrance's Fire-box, 1845, 479
Hawthorn's Link Motion, 1851, 399
Hawthorn's, R. and W., Steam Dome, 399
Midland Brick Arch, 1859, 480
Midland Fire-door, 480
Miscellaneous Details, 1846 to 1855, 399
Naylor's Safety Valve, 642
Radial and Other Axle-boxes, 590
Sand-box, D. Gooch, 1849, 400
Valve Gears and Motion, 454
W. Bridge Adams' Radial Axle, 590

DIESEL Locomotive Design in Germany, 578
Electric Locomotive, 3000-Volt D.C. for the Norte Railway, Spain, 78, 84
Electric Locomotives for Main Lines, Scandinavia, 156
Escher Wyss-Zoelly Steam Turbine Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)
Fifty Per Cent. Cut-off, Pennsylvania Railroad System, E. C. Poultney, Part I., 509, 550
Fifty Per cent. Cut-off Engine in Service, 551
"Decapod" Engine, Heavy Goods, 510
Light-weight Piston Valve, Cylinder and Valve Chest, Valve Gear, 550
Slide Bars and Crosshead, 551
"Mikado" Type, Goods, 510
Water Rates at Various Cut-offs for the 2–10–0 and 2–8–2 Engines, 511
Fireless Engine, Unique, W. G. Bagnall, Ltd., 11
Garratt Locomotive for Burma Railways, 11
Geared Shunting Locomotive, Sentinel Wagon Works, Ltd., 432, 433, 436
Geared Steam Turbine Condensing Locomotive, North British Locomotive Company, Ltd., 9 (*Supplement, January 2nd*, 1925)
German Federal Railways, Electric Locomotives, 623, 650
Gold Coast Railway, Eight-coupled Goods Engine, Vulcan Foundry Company, Ltd., 13
Goods Engine, 0–6–0, London, Midland and Scottish Railway, 10
Goods Tank Engine, 5600 Class, Great Western Railway, 11
Great Western Railway Passenger Engine Viscount Churchill, 11 (*Supplement, January 2nd*, 1925)
Hunslet Engine Company, 2–8–0 Engine for Chilian Mining Railway, 13 (*Supplement, January 2nd*, 1925)
Italian Double-ended Diesel-Electric Locomotive, 358
Italian Locomotives at Grenoble Exhibition, 690
Italian Westinghouse Company's Electric Locomotive, New Type of Link Work on, 690
Krupp-Zoelly Steam Turbine Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)
Locomotives for the London and North-Eastern Railway, Garratt, Beyer, Peacock and Co., Ltd., 715, 716; "Mikado," Mr. H. N. Gresley's Design, 715, 717
Lomonossoff Diesel-Electric Locomotive, 9, 10 (*Supplement, January 2nd*, 1925)
London, Midland and Scottish Railway, "Baltic" Tank Locomotive, 10 (*Supplement, January 2nd*, 1925)
Magnet, Old Stockton and Darlington Railway Locomotive, as Reconstructed, Timothy Hackworth, 440
"Mallet" Simple Locomotive, Chesapeake and Ohio Railroad, 14
Motor Generator Locomotives, 22,000-Volt, American Railways, 334
Narrow-gauge Engine for Assam, Andrew Barclay, Sons and Co., Ltd., 168
Nitrate Railways Tank Engine, 13, 14
North British Locomotive Company's 3ft. 6in. Gauge Engine for the Western Australian Railways, 13 (*Supplement, January 2nd*, 1925)
Reid-MacLeod Turbine Locomotive, North British Locomotive Company, Ltd., 9 (*Supplement, January 2nd*, 1925)
Six-coupled Passenger Engine, East India Railway, Kitson and Co., Ltd., 12, 13
Virginian Railway, Triple Electric Locomotive for, 607

Shears—*see* Machine Tools
Shifting a Bridge in Vienna, 428

SHIPS AND SHIPPING MATTERS:

General:
Cylinder Liner of H.M.S. Triumph, 498
Propeller-jet Marine Propulsion, Edmund S. G. Rees, 494
Screw Propeller, Increasing the Efficiency of, Walter Pollock, 402, 444; (Letter), 468

Foreign Navies:
French Battleship Liberté, Salving the, 487
High-speed Cruiser Marblehead, United States, 358
Italian Scouts, The Leone, Tigre and Pantera, 456, 600, 604
Swedish Destroyers Nils Ehrensköld and O. H. Nordenskjöld, 685

Miscellaneous Vessels:
Aorangi, Union Steamship Company's Motor Liner, Fairfield Shipbuilding and Engineering Company, Ltd., 6, 16, 23, 42, 48, 71, 72, 106, 110, 111 (*Supplement, January 2nd*, 1925) (*Two-page Supplement, January 16th*, 1925)
Aurania, Cunard Twin-screw Liner, 22 (*Supplement, January 2nd*, 1925)
Beldis, Motor Ship, with a Cargo of Locomotives, 86
British Aviator, Motor Tanker, 5, 6 (*Supplement, January 2nd*, 1925)
City of Venice, Single-screw Steamship, Workman, Clark and Co., Ltd., 22, 23
Dolius, Motor Ship, Scott's Shipbuilding Company, Ltd., 5, 7 (*Supplement, January 2nd*, 1925)

SHIPS AND SHIPPING MATTERS (*continued*):
Miscellaneous Vessels (*continued*):
Flettner Rotor Ship Buckau, 23 (*Supplement, January 2nd*, 1925)
Italian Liner Conte Biancamono, Wm. Beardmore and Co., Ltd., 497
Minnetonka, Twin-screw Liner, Atlantic Transport Company, 22 (*Supplement, January 2nd*, 1925)
Orama, Orient Twin-screw Liner, 22 (*Supplement, January 2nd*, 1925)
Oronsay, Orient Twin-screw Geared Turbine Liner, John Brown and Co., Ltd., 185, 190, 212, 213, 214
Raby Castle, Lancashire Shipping Company, Ltd., 458
Ship's Motor Lifeboat with Wireless Equipment, 160; (Letter), 188
Swanley Motor Ship, Barclay, Curle and Co., Ltd., 5, 7 (*Supplement, January 2nd*, 1925)
Twin-screw Ferry Boat Kathleen, John I. Thornycroft and Co., Ltd., 662
SIGNALLING, Automatic, on the Harrow and Rickmansworth Line, 466
Spraying Plant for Laminated Core Stampings, A. C. Wells and Co., 58
Steam Engines—*see* Engines
Steam Meter, Turbine, Kent-Hodgson, 684
Steam Nozzles Research, Report, Thin and Thick Plate Nozzles, and Setting of Nozzle-boxes in the Tester, 536, 565
Steam Regeneration: Its Possibilities, C. O. Towler, 592
Steam Trap, A Simple, E. Lassen and Co., 608
Steel Hardening and Carburising Plant at Coventry, August's Muffle Furnaces, Ltd., 387
Stroboscopic Determination of Speeds and Frequencies, Apparatus and Methods Employed, G. E. Moore, 209
Switchback Railway at the Paris Exhibition, Sir William Arrol and Co., Ltd., 525
Switchgear, H. W. Clothier, 268—*see also* Electrical Matters

T

TINNING Compound, New, Soldo Company, 413
Traction Recorder, Evershed and Vignoles, Ltd., 53
Turbine Equipment for Power Station, 321
Turbine and Gearing for Orient Liner Oronsay, John Brown and Co., Ltd., 185, 190, 212, 213, 214
Turbine, 1200 lb., Half-casing for (Weymouth), 264
Turbine—*see also* Hydraulic

U

UNIFLOW Engines—*see* Engines

Association, British Acetylene and Welding:
Scientific Aspects of Welding, Professor C. R. Darling, 113

Association, British Waterworks:
Annual General Meeting, 634, 718
Programme, 634

Association, Diesel Engine Users':
Pyrometry of Exhaust Temperatures of Internal Combustion Engines, Chas. E. Foster, 598
Recent Oil Engine Developments, J. L. Chaloner, 456
Submarine Engines and High-speed Heavy Oil Engine Electric Generating Sets, P. A. Holliday, 219

Association of Engineers, Manchester:
Annual Dinner, 188
Internal Combustion Turbine, Dr. T. B. Morley, 278
Pulverised Coal, R. Jackson, 97
Visit to Carborundum Company's Works, 598

Association of Technical Institutions:
Annual Meeting, 302
Technical Education, Local Colleges, Decline of Apprenticeship System, 302

Institute, Indian, of Engineers:
Annual General Meeting, 352

Institute, Iron and Steel:
Annual Meeting, 411, 538, 566
Annual Dinner, 411, 541
Programme, 411
Report, 539
Carnegie Research Scholarship Awards, 566
Detection of Strain in Mild Steels, T. H. Turner, and J. D. Jevons, 540
Diamond Pyramid for Hardness Testing, R. L. Smith and G. E. Sandland, 566
Economics of the Heavy Iron and Steel Industry, Presidential Address, Sir Frederick Mills, 524
"Flakes" or "Hair Cracks" in Chromium Steel, A. Hultgren, 539
Gases and Formation of Blow-holes, A. G. Lobley and C. L. Betts, 540
Grain and the Fatigue Strength of Steels, O. L. Aitchison and L. W. Johnson, 540
Martensite and Troostite, T. H. Whiteley, 567
Nitrogen and Temper Brittleness, W. T. Griffiths, 566
"Peeling" in White-Heart Malleable, D. H. Ingall and H. Field, 566
Progress in British Rolling Mill Practice, T. W. Hand, 539
Quenched Carbon Steels, B. D. Enlund, 567
Stain Detection in Mild Steel by Special Etching, J. D. Jevons, 540
Temper Brittleness of Steel, R. H. Greaves and J. A. Jones, 566

Joint Meeting with Faraday Society, 648
Chemistry of Steel Making, 648

Institute of Marine Engineers:
Presidential Address, Sir Westcott Abel, 191

Institute of Metals:
Annual General Meeting, 223, 294, 324; Programme, 223
Annual Dinner, 294
Abrasion of Metals, Experiments, &c., Professors, K. Honda and R. Yamada, 326
Aluminium Alloy Castings, Improving the Properties of, S. L. Archbutt, 294
Aluminium-Zinc System, Professor Tomimatu Isihara, 325
Brittle Ranges of Brass, Dr. Denis Bunting, 324
Commercial Copper Rod, Comparative Tests, &c., T. G. Bamford, 324
Copper-Zinc System, G. L. Bailey and R. Genders, 325
Density of Rhodium, Sir Thomas Kirke Rose, 325
Effect of Grain Size upon Hardness and Annealing Temperature, H. T. Angus and P. F. Summers, 294
Electrical Resistivity of Copper, A. L. Norbury, 325
Industrial Brasses, G. L. Bailey and R. Genders, 325
Motion of Electricity in Metals, Annual Lecture, Professor H. A. Lorentz, 512
Removal of Red Stains from Brass, E. A. Bolton, 325
Surface Abrasion and Corrison, Ulick R. Evans, 294

Institute of Transport:
Annual Congress, 541
List of Papers and Programme, 541
Modern Dock Equipment, H. J. Deane, 571

Institution of Chemical Engineers:
Internal Combustion Boiler, Oscar Brunler, 184
Supersaturation, Professor A. L. Mellanby, 543

ASSOCIATIONS, INSTITUTIONS & SOCIETIES (*continued*):

Institution of Civil Engineers:
Conversazione, 684
Lectures, "Progress of Steam Locomotive during the last Century," Sir H. Fowler; "Air Transport," Sir W. Sefton Brancker; "Reminiscences of Mount Everest Expedition, 1924," N. E. Odell, 684
Metering Steam, Kent-Hodgson Turbine Steam Meter, 684
Exhibits, Rotary Air Compressors, Reavell Rolling Drum; Small, for Hospitals and Laboratories, Mr. Quertier, 684; Cement Spraying Apparatus and Stucco Gun, Professor S. M. Dixon, 684; Prints and Photographs of Early Locomotives and Trains, Models, &c., 685
Effect of Camber on Wood-paved Roads, James Garvie, 570
Heat Engine Trials Committee, Joint Meetings, 357, 520
Heavy Oil Engines, Large Engines of the Self-ignition Type, James Forrest Lecture, by Captain H. Riall-Sankey, 508
October Examinations, 1924, Pass List, 114

Birmingham and District Association:
London Water Supply, Some Features of, H. E. Stilgoe, 159

Institution of Electrical Engineers:
Design of Electrical Plant Control Gear, &c., H. W. Clothier, 268
Electric Forces and Quanta, Kelvin Lecture, J. H. Jeans, 181
Electricity in Mines, Major E. Ivor David, 244, 248
Roll of Honour, 1914–1919, 456
Summer Meeting, 380, 660, 677
Programme, 380
Visit to Birmingham Corporation's Power Station at Nechells, 654, 660
Visits to Witton Factory, General Electric Company, 677; Austin Motor Co.'s Works, Longbridge, 678; Longbridge Arc Rectifier Sub-station, 678; Overhead Distribution System, Catshill, 679; Stourport Power Station, 679; British Thomson-Houston Co.'s Works, 680
Three-wire Direct-current Distribution Networks, H. W. Taylor, 75
Wireless Telegraphy and Signalling Bill, 349

WESTERN CENTRE:
Summer Meeting at Dursley, Gloucestershire, 634

WIRELESS SECTION:
Current Transformer Methods of Producing Small Known Voltages, &c., D. W. Dye, 295
High-frequency Resistance Measurement, New Method, Professor E. Mallet and Mr. A. D. Blumlein, 69
Measurement of Frequency and Allied Quantities, &c., Colonel K. E. Edgeworth and G. W. N. Cobbold, 295

Institution of Engineers and Shipbuilders in Scotland:
Four-cycle Marine Oil Engine, H. H. Blache, 246, 247

Institution of Gas Engineers:
Annual Meeting, 414; Provisional Programme, 414
Presidential Address, Excerpts from, J. Ferguson Bell, 656

Institution of Heating and Ventilating Engineers:
Hot Water Supply Installations for Hospitals, H. G. Cathcart, 714

Institution, Junior, of Engineers:
High-pressure Cables, Major A. M. Taylor, 115; (Letter), 140
Inverted Tooth-chain Drives, J. M. Seddon, 280
Irrigation Engineering in Burma, A. P. Morris, 380
Milestones in the Development of the Prime Mover Locomotive, Honorary Member's Lecture, Loughnan Pendred, 223
Power Plant Records, R. H. Parsons, 140
Presidential Address, Dr. Alexander Russell, 76

Institution of Locomotive Engineers:
Annual Dinner, 244

Institution of Mechanical Engineers:
Annual General Meeting, 236; Election of Council, 236; Annual Report, 236
Anti-friction Bearing Applications for Heavy Duty, J. B. Dahlerus, 181, 197, 237
Cutting Tools Research Committee Reports:
Action of Cutting Tools, Professor E. G. Coker, 318
Flow and Rupture during Cutting, Dr. W. Rosenhain and Mr. A. C. Sturney, 126
Forces on a Cutting Tool, Dr. T. E. Stanton and Mr. J. H. Hyde, 126
Lathe Tools, Experiments with, &c., Dempster Smith and Arthur Leigh, 318
Examinations, April, 1925, 691
Hardness Tests Research, Adhesion between Tool and Material, G. A. Hankins, 483
Hardness Tests, Scratch, G. A. Shires, 483
Steam Nozzles Research Committee's Report, 536
Summer Meeting, 295; Provisional Programme, 295
Tests on a Two-stroke Cycle Oil Engine, Professor E. A. Allcut, 593
Joint Meeting with Institution of Naval Architects, Report of Marine Oil Engine Trials Committee, 346

GRADUATE SECTION:
Super-power Stations in America, Annual Lecture, W. H. Patchell, 264

NORTH-WESTERN BRANCH:
Corrosion-resisting Steels, Dr. W. H. Hatfield, 431
Steam Nozzles Research Committee, Fourth Report, 565
Swiss Railway Electrification, E. A. Eborall, 485
Wire Ropes Research Committee, Second Report, Dr. W. A. Scoble, 128

ASSOCIATIONS, INSTITUTIONS & SOCIETIES (*continued*):

Institution of Mining Engineers:
Eighty-third General Meeting, 608
Programme, 608

Institution of Municipal and County Engineers:
Annual General Meeting and Conference, 572
Programme, 572

Institution of Naval Architects:
Annual Meetings, 336, 376, 401, 429; Programme, 336; Annual Dinner, 379; Report, Awards for Papers, Elections, 376
Analysis of Sir John Biles' Paper on H.M.S. Wolf Experiments, G. H. Hoffmann, 401
Efficiency of the Screw Propeller, Suggested Method of Increasing, Walter Pollock, 402, 414
Form Effects and Form Resistance of Ships, W. G. A. Perring, 402
Japan's Contribution to Naval Architecture, Professor F. B. Purvis, 401
Marine Oil Engine Trials Committee, 346, 403
Model Experiments with Anti-rolling Tanks, H. J. R. Biles, 429
Notes on the Rolling of Ships, G. Vedeler, 429
Propulsive Performance of the Corrugated Ship, E. V. Telfer and A. H. Haver, 430
Skin Friction Committee's Report, 402
Stability and Seaworthiness, G. Frodsham Holt, 430
Steam Engines *v.* Oil Engines for Passenger Ships, Sir John Biles, 377, 388
Stresses in Rectangular Plates, &c., Professor C. E. Inglis, 429
Tonnage Legislation, E. Blocksidge, 430
Trading Conditions and Intermediate Passenger Vessels, W. G. Cleghorn, 430
Wake Propeller Coefficients, Admiral D. W. Taylor, 402

Institution, North-East Coast, of Engineers and Shipbuilders:
Conversion of the S.S. Bintang, L. J. Le Mesurier, 380
Fuel Consumptions of Steam and Oil-engined Vessels, Sterry B. Freeman, 136

Institution, Royal:
Faraday as a Chemist, Sir Wm. Pope, 686
The Counting of Atoms, Sir Ernest Rutherford, Studies of Atomic Nuclei, 278, 331, 362, 380

Institution of Water Engineers:
Thirteenth Summer General Meeting and Programme, 719

Society of Engineers and Metallurgists:
Lecture on Gas Furnaces, Stanley A. Sears, 352

Society, Faraday:
Joint Meeting with Iron and Steel Institute, 648
Chemistry of Steel Making, 648

Society of Glass Technology:
Design of Modern Glass-melting Furnaces, 154
Sillimanite as a Glass Works Refractory, F. G. Clark and W. J. Rees, 273
Sillimanite in the Preparation of Refractory Materials, A. Cousen and Professor W. E. S. Turner, 273

Society, Liverpool Engineering:
Construction of a Spirally Guided Gasholder and Tank at Garston, E. Astbury, 291

Society, Radio, of Great Britain:
Presidential Address, Sir Oliver Lodge, 139
Resistance in Wireless Circuits, Lecture by Professor C. R. Fortescue, 265

Society, The Royal:
Conversazione, Various Exhibits, 541

Society, Royal, of Arts:
Cantor Lectures, Three, on Atomic Structure of Metals and Alloys, Dr. W. Rosenhain, 293

Society, Royal Meteorological:
Seventy-fifth Anniversary Celebration, 434

Society, Royal Microscopical:
Conference at Sheffield, 390

Societies, Physical and Optical:
Exhibition, 52

ATOMIC Structure of Metals and Alloys, Dr. W. Rosenhain, 293
Atoms, The Counting of Atomic Nuclei, Sir Ernest Rutherford, 278, 331, 362, 380
Austin, J., Preventing Corrosion of Condenser Tubes, 223
Australia, Irrigation Works in, 462, 465
Australian Engineering Notes, 54, 223
Australian Naval Defence, 383
Automatic Regulators, Temperature, Pressure, &c., British Area Regulators, Ltd., 351
Automatic Telephones, 302

B

BAILEY, G. L., and R. Genders, "The Copper-Zinc System," also on "Industrial Brasses," 325
Bamford, T. G., Commercial Copper Rod, Comparative Tests, 324
Barking Power Station, 568
Barnes, Alfred A., on Dry-weather Flows, 713
Biles, H. J. R., Model Experiments with Anti-rolling Tanks, 429
Biles, Sir John, Steam Engines *v.* Oil Engines for Passenger Ships, 377, 388
Birthday Honours, 624
Blache, H. H., Four-cycle Marine Oil Engine, 246, 247
Blocksidge, E., Tonnage Legislation, 430
Blow-pipe Metal Cutting Machine, Hancock and Sons, 238
Blue Print Washing and Drying Machine, Precision Photo Printing Plant, Ltd., 523
Boiler, Atmos High-pressure, J. V. Blomquist, 249
Boiler, Internal Combustion, Oscar Brunler, 184
Bolton, E. A., Removal of Red Stains from Brass, 325
Books of Reference, 248, 277, 326, 460, 544, 659, 717
Bow Power Station, 542, 546
Brass, Brittle Ranges of, &c., Dr. Denis Bunting, 324
Brass, Removal of Red Stains from, E. A. Bolton, 325
Brasses, Industrial, G. L. Bailey and R. Genders, 325
Bridge, Guillemard, Over the Kelantan River, 594
Bridge, New, Over the Niagara River, 490, 492
Bridge in Vienna, Shifting, 429
Bridge, Waterloo Temporary, Sir Wm. Arrol and Co., Ltd., 686, 701 (*Two-page Supplement, June 26th*, 1925)
Bridges—*see also* Road
British Chemical Standard Hematite Iron Ore, 170

British Engineering Standards Association:
Address, C. le Maistre, 129

SPECIFICATIONS:
Automobile Parts, Three New Standards, 718
Bright Bolts, Nuts and Studs, 335
Steels for Laminated Springs for Automobiles, 380

BRITISH Engineers' Association, Report on the Present Condition and Future Prospects of the Engineering Industry, 409, 415
British Locomotives—*see* Railway Locomotives
Broadcasting—*see* Wireless
Brunler, Oscar, on Internal Combustion Boiler, 184
Bunting, Dr. Denis, Brittle Ranges of Brass, 324
Burton, Alexander, J. T., French Locomotive Performances, 153
Bryan Donkin and Co., History of, 544

C

CABLES—*see* Electrical Matters
Calendars, Diaries, &c., 29, 55, 86, 119, 145, 227, 557
Canada, Terms of Payment in, 85
Canada, Water Power Resources of, 97, 439
Canadian Water Power and Reclamation Service, 714
Canal, Rhine to Rhone, Improvement of the, 291
Carbonisation—*see* Coal
Catalogues, 145, 201, 393, 419, 447, 501, 557, 585, 637, 693, 721
Cathcart, H. G., Hot Water Supply Installations for Hospitals, 714
Cellular Gravity Dam, Design for, Reginald Ryves, 279
Centenary of Henri Giffard, 1825–1882, 83
Ceylon, High Head Hydro-electric Scheme in, 619
Chain Link Making Machine, Wm. Grice and Sons, Ltd., 469
Chain Making, Wire, 239, 276, 292
Chaloner, J. L., Recent Oil Engine Developments, 456
Chancy-Pougny Hydro-electric Power Station, 321, 328
Chassis, 2-Ton, War Office Subsidy, Vulcan Motor and Engineering Company (1906), Ltd., 378, 379
Chemistry of Steel Making, 648
Chuck, Strength of, Alfred Herbert, Ltd., 662
Circular Saw Guard, New, M. Glover and Co., 223
Circulating Water Screening Plant, Fixing, F. W. Brackett and Co., Ltd., 224
Cleghorn, W. G., Trading Conditions and Intermediate Passenger Vessels, 430
Clothier, H. W., Design of Electrical Plant Control Gear, &c., 269
Clyde—*see* Dock Equipment

COAL, COKE AND COLLIERIES:
Carbonisation of Coal in Vertical Retorts, Walter T. Dunn, 470
Coal Pulverising Plant and Boilers at Nechells Power Station, 656, 660
Coal Staith, New, on the Tyne, R. E. Hindmarsh, 134, 141
Electric Lighting System for Collieries, British Insulated and Helsby Cables, Ltd., 496
Low-Temperature Carbonisation, Some Aspects of, Lecture, N. Simpkin, 487
Pulverised Coal, R. Jackson, 97
Sale of Coke by Analysis, 464
Steep Colliery Ropeways in South Wales, R. White and Sons, 514 (*Two-page Supplement, May 8th*, 1925)
Winder, Colliery, Geared Electric, English Electric Company and Robey and Co., Ltd., 404, 408

COKER, Professor E. G., Action of Cutting Tools, 318
Commercial Libraries, Charles Nowell, 50
Comptroller of Patents, 192
Condenser Tube Corrosion, J. Austin, 223
Contracts, 29, 61, 92, 122, 145, 173, 204, 230, 253, 286, 309, 337, 368, 393, 422, 447, 473, 504, 532, 560, 588, 614, 637, 665, 696, 724
Converters—*see* Electrical Matters
Coopers Hill War Memorial Prize, 361
Copper Rod, Commercial, Comparative Tests, T. G. Bamford, 324
Copper-Zinc System, G. L. Bailey and R. Genders, 325
Corrosion Again, 217
Crane Essentials, Standardisation of, Edward G. Fiegehen, 619
Crane, 20-Ton Goliath, S. H. Heywood and Co., Ltd., 658
Crane, Travelling Steam, Samuel Butler and Co., Ltd., 443
Crisis in the Engineering Industries, 409, 415
Current Prices for Metals and Fuels, 30, 62, 90, 120, 146, 174, 202, 228, 254, 284, 312, 340, 366, 394, 420, 448, 474, 502, 530, 558, 586, 612, 638, 666, 694, 722
Cutting Tools—*see* Machine Tools

D

DAHLERUS, J. B., on Anti-friction Bearing Applications for Heavy Duty, 181, 197, 237, 243; (Letters), 295, 434
Dam, Gleno, Case for the Owners, 330, 467; Another Report, 661
Darling, Professor C. R., Scientific Aspects of Welding, 113
David, Major E. Ivor, on Electricity in Mines, 244, 248
Dawson, Sir Philip, and Professor S. Parker Smith, on Main-line Railway Electrification, 98, 156, 620, 650; (Letters), 240, 295
Deep Mining on the Rand, 263
Deschamps, J., Influence of Pulsations on Combustion, 152
Deutsches Museum, Munich, 644
Diesel Engines—*see* Engines
Dielectrics, Super-tension Cable, A. I. Tracey, 580
Dock Equipment, Modern, H. J. Deane, 571
Dock Equipment, New, on the Clyde, 233, 242, 274, 304, 332; (Letters), 434, 468
De-watering Plants for Graving Docks Nos. 1 and 3, 233, 242
No. 3 Graving Dock Pumps, 274
Hydraulic Power Services for Prince's Dock and the Graving Docks, 304
Pneumatic and Electric Services, Prince's and Graving Docks Nos. 1, 2 and 3, 332
Doors, Train—*see* Railways
Drills—*see* Machine Tools
Dry Dock, American, Repairing, 359
Dry-weather Flows, Alfred A. Barnes, 713
Dye, D. W., Current Transformer Methods of Producing Small Known Voltages, &c., 295

E

EBORALL, E. A., Swiss Railway Electrification, 485
Education, Some Aspects of, 437
Educational Intelligence, 443
Effective Sluicing from a Spanish Reservoir, 320

ELECTRICAL MATTERS:
See also Annual Articles
Ammeter, "Circacle," and Change Coil Multi-range Test Set for Alternating and Direct Currents, Record Electrical Company, 279
Aorangi, Electric Equipment for—*see* Ships
Barking Power Station, County of London Electric Supply Company, 568
Beama Annual Luncheon, Sir Benjamin Longbottom's Address, 356
Bow Power Station Reconstruction, 542, 546
Cheap Electricity, 167
Combined Electric Motor and Pump, Rhodes, Brydon and Youatt, Ltd., 662
Constant-current Motors, Gilbert Austin, J. C. Macfarlane's Notes, 440
Dock Equipment on the Clyde, New, 233, 242, 274, 304, 332
Electric Forces and Quanta, Kelvin Lecture, J. H. Jeans, 181
Electricity Commissioner, New Appointment, 569
Gas Engineers and the Electrical Subsidy, 683
High Frequency Resistance Measurement, New Method, 69
High-pressure Cables, Major A. M. Taylor, 108, 115; (Letter), 140
High Voltage Testing Laboratory, Metropolitan-Vickers Electrical Company, 481
Hydro-electric Power Station, Chancy-Pougny, 321, 328
Institution of Electrical Engineers, Various Works Inspected during Summer Meeting, 654, 660, 677–680
Insulation, 520
International Conference on Extra High-tension Electric Systems, 273
Leafield Coupled Arc, 634—*see also* Annual Articles and Supplement
Machine Tool Switchgear, Electrical Apparatus Company, 362
Million-volt Testing Equipments, Ferranti, Ltd., 412
Motor Starting Panels, Midget Type, Brookhirst Switchgear, Ltd., 142
Nechells Power Station, Birmingham, 654, 660
Ongar and Brentwood Wireless Stations, 596, 597
Raby Castle, Diesel-electric Generating Sets, 459
Radio Frequency Relay, A New, 498
Recent Oil Engine Developments, J. L. Chaloner, 456
Rotary Converters, 1500-Kilowatt Self-synchronising, Mather and Platt, Ltd., 390
Self-synchronising Alternator, L. J. Hunt, 526
Southern Railway, New Single-phase Equipment, General Electric Company, 486
Static Condensers for Power Factor Correction, 543
Super Power Stations in America, W. H. Patchell, 264
Super-tension Cable Dielectrics, A. I. Tracey, 580
Switchgear, H. W. Clothier, 268
Synchronous Motors for Mining Work, Major E. Ivor David, 244, 248
Three-wire Direct-current Distribution Networks, H. W. Taylor, 75
Transformers, Large, Ferranti, Ltd., 680
Upper Reno Power Project, 608
Use of Electricity, 463; (Letter), 485
Variable Speed Alternating-current Motors, Notes on, N. Pensabene-Perez, 624
Winder, Geared Electric, English Electric Company, 404, 408

ELLESMERE Port, Water Softening Plant, Wollaston Gas Producers (Manchester), Ltd., 386

ENGINES AND MOTORS:
Aero-engines:
Aero-engine Performance, 55
Anzani Aero-engine, 21
Blackburn Three-cylinder Radial, 21
Blackburn Twin-cylinder Inverted, 21

ENGINES AND MOTORS (*continued*):
Aero-Engines (*continued*):
Bristol Cherub, 19, 21
Eagle IX Engines for All-metal Flying Boat, 350, 354
Napier "Cub" Engine, 1000 H.P., 21
Napier "Lion" Engine, 21
Rolls-Royce 360 H.P. "Eagle" Engine, 21
Siddeley 230 H.P. "Puma" Engine, 21
Variation of Aero-engine Power with Height, 595
Aorangi, Union Steamship Company's Motor Liner, Fairfield Shipbuilding and Engineering Company, Ltd., Sulzer Type Diesel Engines and Auxiliaries, 6, 16, 23, 42, 48, 71, 72, 106, 110, 111 (*Supplement, January 2nd*, 1925) (*Two-page Supplement, January 16th*, 1925)
Cold-starting Solid Injection Oil Engine, 110 B.H.P., Ruston and Hornsby, Ltd., 222, 223
Crude Oil Engine, Two-stroke Vertical, Crossley Brothers, Ltd., 222
Diesel Locomotives—*see* Railway Locomotives
Double-acting 6750 Engine for Motor Liner Gripsholm, Burmeister and Wain, 246, 247
Four-cycle Marine Engines, Burmeister and Wain, 246, 247
Future of the Marine Steam Engine, 384
Gas Engine, 7150 B.H.P., Soc. Anonyme John Cockerill, 166, 168
Gas or Paraffin Engine, 12½ B.H.P., Crossley Brothers, Ltd., 222
Heat Engine Trials Committee Meeting, 520
Heavy Oil Engine, 66 H.P., National Gas Engine Company, 222, 223
Heavy Oil Engines, Large Engines of the Self-ignition Type, James Forrest Lecture by Captain H. Riall Sankey, 508
Lighting Set, Gas Engine and Chain-driven Dynamo, National Gas Engine Company and Electrical Construction Company, 222, 223
Lighting Set, 3 B.H.P. Paraffin Engine and 1½ K.W. Dynamo, Ruston and Hornsby, Ltd., 222, 223
Marine Oil Engine Progress, 191
Marine Oil Engine Trials Committee, 346, 355, 403
Motor Foam Fire-fighting Engine, 467
Motor Lifeboat Engine, Parsons Motor Company, Ltd., 160; (Letter), 188
Oil Engine, 55 B.H.P., and Fuel Injection Arrangement, Blackstone and Co., 238
Oil Engine Difficulties, 491
Pyrometry of Exhaust Temperatures of Internal Combustion Engines, Chas. E. Foster, 598
Raby Castle, Propelling Machinery for, North-Eastern Marine Engineering Company, 458
Steam Engines *v.* Oil Engines for Passenger Ships, Sir John Biles, 377, 388
200 K.W. Steam Extraction Generator Set, Ashworth and Parker, 630
Two-stroke Cycle Oil Engine, Tests on, Professor E. A. Allcut, 593
Vibration in Engine Test Gear, J. Morris, 484

ENGINEERS, Salaries of, 114
Engineers, Status of, 107; (Paragraph), 89
Engineering Industry—*see* British Engineers' Association
Evans, Ulick R., Surface Abrasion and Corrosion, 294
Evolution—*see* Ships

EBBW VALE Ironstone Mines, Reopening, 215

ELECTRICAL MATTERS:
Alternating Currents in Sheathed Cables, Losses Involved in Distribution, 489
Automatic Rotary Converter Sub-station, Third Completed in Durban, 545
Berlin, Proposed New Electric Power Station, 681
Birmingham's Profit on Electric Supply, 653
Botany, N.S. Wales, Suggested as Site for New Power-house, 625
Buenos Aires Projected Big Electric Power Installation, 709
Cable between Vancouver and Fiji to be Doubled, 161
Canada, Big New Power Plant and Transmission Line to Winnipeg, 15
Canadian Montmorency Power Company, Projected 6000 H.P. Development, 407
Capetown, New Generating Station for, 625
Chinese Government, Shansi Province, to Erect Steam-electric Power Plants, 709
Darlington Electricity Undertaking, Output and Working Cost, 105
Earth Connection, American Method of Making, 241
Electrical Industry and Prices in Prussia, Poor Trade, 105
Electric Main Underground Haulage, 517
Electricity Production by Public Utility Power Plants in 1924, 709
Explosions in Electrical Conduits and Sodium Salt, 517
Farms' Need of Electric Power and Excessive Cost of Application, 545
Fireproofing Medium for Protection of Switchboard Wire, 625
Halifax and Huddersfield Electricity Undertakings, Linking-up Scheme Proposed, 435
Huddersfield and Halifax Corporation Power Plants, 461
Insulated Electric Wire, Flame-proofing by Selenium, 299
Insulating Varnish for Prevention of Flash-overs, 489
International Conference in Paris, on Extra High-tension Systems, 327
Johannesburg Power Station Cooling Towers, 85
Measuring Tape and Live Circuits, Protective Apparatus, 161
Million-Volt Arc, 326
Motors, Large, for Rolling Mill Drive, 461
Mysore, Generation of Power from Gersoppa Falls, 15
New Electric Lighting Plant at Agra, 681
New York Edison Company's Projected 700,000-K.W. Generating Station, 625, 653
Plympton, Divided Opinion as to Erection of Power-house, 599
Power-house Extension at Bendigo, Victoria, 133
Power Line Interference with Radio Broadcast Reception, 241
Power Plant, Large, for Alaskan-Canadian Border, 435
Power Plants Used in Danish Agriculture, 686
Power Supply for Siddick Colliery, 517
Power Transmission, 100,000-Volt, to be Brought Across the Narrows, Puget Sound, 381
Prague and Kolin, Laying Long-distance Cable, 161
Rural Electrification in Michigan, 381
Shawinigan Company's Power Development on Batiscan River, Quebec, 77
Snake River, Idaho, Survey with View to Power Development, 381
South Africa and Electricity Supply, Interruptions by Lightning, 681
Steam-driven Large Power Station to Replace Tokyo Stations Destroyed by Earthquake, 269

ELECTRICAL MATTERS (*continued*):
Tafjord Power Development Scheme in Norway, 161
Traffic Control by Spot-lighting Apparatus, Experiment in Leicester, 435
Transformer Load, Device for Indicating, While in Motion, 545
Trichinopoly, Small Electrical Power Supply for, 133
Trolley Omnibuses to Supersede Electric Trams in Singapore, 105
Trucks, Electric, Charging Facilities for, 327
Tunnel under Ben Nevis to Carry Water for New Power-house, 269
Turbo-alternator, 5000-K.W., Metropolitan-Vickers, for Durban, 681
Turbo-generator, 7500-K.W. Set for Wolverhampton, 489
Walsall Electric Supply, Charges Reduced in Consequence of Low Cost, 299
Warwick Electricity for Coventry, 133
Water-tube Boilers, Vickers-Spearing, for Bloemfontein Power Station, 407
West Bromwich Electricity Department, New Showrooms and Stores, 461
Worksop Electric Power Plant Extension, 653
Yellow River Power Development Scheme, 709
ELECTRO-FARMING, 442
Engine, Double-acting Marine Oil, Largest Built in Great Britain, 461
Engineering Standards—*see* British
Engineers in Canada, Overcrowded and Inexperienced Profession, 241
Engineers and Chemists, Status of, 89

"SAFETY First" Device by Model Van, J. Lyons and Co., 517
St. Lawrence River Power Development, 215
San Joaquin River Water Diverted by Tunnel, 545
Sawdust Roads, Experiments with View to Making, 599
Scholarships for Apprentices, 523
Scholarships, B.E.A.M.A., 567
Scholarships, Engineering, Norton and Gregory, 541
Science Museum at South Kensington, Stationary Engine Exhibits Catalogue, 256
Scientific and Industrial Research, New Members of Advisory Council, 215
Seismograph Station, A Sixth Established in Quebec, 625
Sewerage Scheme, Extensive, for Knutsford, 653
Shanghai, Single-deck Motor Omnibus Statistics, 517
Shannon Power Scheme Report, Dr. H. H. Jeffcott, 653

SHIPS AND SHIPPING MATTERS:

American Ships, Conversion of Fourteen Steamers to Motor Ships, 489
Barrow and New York Steamer Service to Cease, 133
Bulkheads and Water-tight Subdivision of Passenger Steamships, Board of Trade Report, 241
Chauncy Maples Steamer on Lake Nyassa, Thirty Years Old and Still Valuable, 105
Commonwealth Lighthouse Service, Launch of Two Steamers for, 133
Conciliation Machinery for Shipbuilding Federations, 299
Corrugated-sided Ships, Greater Efficiency of, 599
Cunarder Saxonia Sold for Breaking-up, 299
Deck Equipment of the Discovery, Pacific Exploration Vessel, 709
Diesel-electric Tanker, New Arrangement of Engine-room, 215
Fifty Years of Yacht Designing, G. L. Watson and Co., 544
Flettner Rotor Ship, Report of Another, 599
Flettner Rotor Ships, Two New, Ordered, 105
Funnel Markings of Destroyer Flotillas, 545
German Naval Administration, First Large Rotor Ship, 517
Glatton, Monitor, Wreck of, to be Removed from Harbour, 15

SHIPS AND SHIPPING MATTERS (*continued*):

Grain Cargo-loading Record, 327
Japanese, Large, Ship Taken up River to Shanghai, 517
L.M.S. Turbine Steamer Glen Sannox, Official Trials, 625
Majestic, Reported Crack Discovery, 15
Montrose Liner, Quick Overhaul, 489
Motor Boat, Fast, Races on the Thames, 545
Motor Lifeboat Construction Progress, 77
Motor Vessel Production Increasing, Chiefly on the Continent, 381
Ocean Towing, Record Long Distance, 435
Railway-owned Vessels—*see* Railways
Rotor Ship, Arrival of the Flettner, 227
Scapa Flow Salving of German Destroyers, Progress, 407, 517, 573, 709
Shipbuilding Trades' Investigation, 637
Signal by Combined Visible and Whistle Device for Motor Ships, 269
Tees Shipbuilding Order, 573
Tyne Shipbuilding Output Statistics, 15
United States Steam Ship to Motor Ship, Conversion, 415
Vancouver Harbour Ship Traffic Statistics, 161

V.D.I. Meetings in Augsburg, 422
Vickers Westminster Amateur Operatic Society, 554

W

WAR Department Motor Van, 342
Washington, National Museum of Engineering, 299
Water Energy, Potential, of the World, Estimate, 489
Water Power Plant Completed at Elko, British Columbia, 545

WATER SUPPLY:

Bacteria in Water at Different Depths, 407
Barnsley Supply Increase, New Pumps, 489
Batley Corporation's New Reservoir, 599
Birmingham New Reservoir and Pumping Engines, Work Started, 625
Birmingham Water Committee's New Pipe Line, 407
Buenos Aires, Neighbouring Districts of, Extensive Government Scheme for Water Supply and Drainage, 709
California, New Supply for East Bay Cities, 15

WATER SUPPLY (*continued*):

Esthonia, Up-to-date Waterworks for, 241
Fourth Pipe Line from Thirlmere to Manchester, 517
Karachi New Water Supply, 105
Madras Supply, Measures for Increasing, 189
Manchester Supply, Another Lake Requisitioned, 189
Melbourne Water Supply, the Maroondah Dam, 188
New South Wales, Wollongong and Port Kembla, Additional Supply, 215
Port Sudan Supply, Completion of Pipe Line, 489
Quebec, Storage Reservoir at Lake Metis, 189
Sheffield, Additional Water Supply Scheme, 77
Sydney, N.S.W., Scheme to Supplement Supply, 545
Toronto, Supplementary Waterworks System, 47, 105
Tsingtao Waterworks, Predicted End of German Plant and Japanese Pumps, 15
Vancouver Waterworks System Extension, 592
Water Consumption in Sydney, N.S.W., 189
Water Waste in America, Uncharted Discharges, 353
Wooden Water Main Laid in 1874, 15

WELDING Aluminium, New German Process, 189
Welland Canal, Big Contract for Canadian Company, 15, 545
West Australian Oil Hunt Pronounced Hopeless, 15
Western Australia, Engineers Wanted, 461
Whitworth Society, Annual Dinner, 27
Windmill, 200 Years' Old, near Hastings, Collapse of, 709
Wire Rope Vibration Dangers, G. H. Griffiths, 299
Wire Rope Works, New, at Newcastle, N.S.W., 407
Wire Weaving Loom, Largest in the World, 269

WIRELESS TELEGRAPHY AND TELEPHONY:

American and Swedish Wireless Amateurs' Two-hour Test, 161
Austrian Broadcasting Developing, 327
Belgium's One Broadcasting Station, 681
Big Ben Broadcasting Microphone, 681
Broadcast Transmitting Apparatus at Marconi House Re-established, 681
Broadcasting Conference of European Authorities, 373
Broadcasting and Interference, Northolt Station Accused, 105
Broadcasting Receiving Apparatus, Lecture, G. E. Jones, 353
Canada, North-Western Section of North-West Territories, Completion of Wireless System, 435
China and Amateur Radio Work, 327
Colombo, Modern High-power Broadcasting Station, 461
Greenland's New Wireless System, 161
Indian Radio Telegraph Company, Prospectus and Objects, 353
Indian Station for Commercial Service with United Kingdom, 327
Institute of Patentees' Assistance Sought by B.B. Company, 435
Japan and San Francisco, Wireless Communication Over 4500 Miles, 77
Japanese and American Wireless Schemes, 407
Listening-in, Near and Distant Reception, 403
Marconi Clifden Station, Ireland, to be Dismantled, 709

WIRELESS TELEGRAPHY AND TELEPHONY (*continued*):

Marconi House, Change-over of Aerial to Oxford-street, 456
Miners and Signals by Wireless, 47
North-West Territories and Yukon Wireless System, Most Northerly Main Station, 625
Oscillating Receiver Disturbance Tests, 407
Radio Apparatus Exhibition at Zurich, 681
Radio Direction Finding Stations for Indian Ports, Experimental Receivers, 435
Rating of Storage Batteries for Wireless Service, 189
Rugby High-power Wireless Station Progress, 353, 517
Russian Wireless Development and Exhibition at Moscow, 599
Tracking Criminals by Wireless, Police Vans Equipped, 105
Transmission of Wireless Messages, Reported Valuable Invention, 105
Wireless Bill, Strong Objections to its New Provisions, 269

WOLVERHAMPTON Local Sewage Plant Extension, 709
Woman Member, The First, of Society of Engineers (Incorporated), 269
Woolwich Research Report on "Gun-wire," Imperfect Elasticity, 77

Z

ZINC Ore Smelted in Retorts, Residues from, 353
Zinc, Pure, for Alloy Purposes, Belgian Works Largely Increased Production, 269
Zoological Gardens, Casualties Among Tropical Birds in London, 241

PRINTED FOR THE PROPRIETORS BY GEORGE REVEIRS, LIMITED, AT GREYSTOKE PLACE, FETTER-LANE, LONDON, AND PUBLISHED BY ARTHUR RONALD VAUGHAN AT THE ENGINEER OFFICE, 33, NORFOLK-STREET, STRAND, IN THE PARISH OF ST. CLEMENT DANES, IN THE COUNTY OF MIDDLESEX.—FRIDAY, JULY 24, 1925.
